Qianghao Ken Wu

Waterloo, ON, Canada | Milan, Lombardy, Italy
+1 4379713179 (CA) | +39 3808991539 (IT) | ken.wu@uwaterloo.ca

EDUCATION

University of Waterloo — **Waterloo, Ontario, Canada**
Bachelor of Computer Science in Computer Science — 2022 September - 2025 September

Wilfrid Laurier University — **Waterloo, Ontario, Canada**
Bachelor of Business in Business Administration — 2022 September - 2025 September

SKILLS

Technical Skills: Python, Tensorflow, Keras, spaCy, Computer Vision, NLP, Pandas, NumPy, SQL, C
Languages: Fluent in English; Fluent in Chinese; Conversational Proficiency in Italian
Certifications & Training: IITB Data Science Bootcamp, IITB Deep Learning Bootcamp, Introduction to Quantum Computing, Machine Learning Zoomcamp, Next Generation Tech Booster (SQL)

INTERNSHIP EXPERIENCE

Keywords AI — New York, United States (Remote)
Part-Time Software Development Engineer — Mar 2023– Jun 2023

- Developed a resume-parsing *Python* script using *OpenAI API* and *spaCy*
- Trained a *spaCy* resume parsing *NER* model with ~40% accuracy with 18 parameters
- Implemented caching on OpenAI API queries using SQLite and GPTCache
- Managed 12 interns on data labeling and prompt engineering to optimize model performances

delphai — Berlin, Germany (Remote)
Machine Learning Engineer Intern — Jul 2022– Sept 2022

- Utilized *spaCy* and *Python* to develop a *NER* model for company names in Chinese
- Scraped articles using *web scraping packages* and labeled 2000 instances using *Azure* and *Prodigy*
- Hyper tuned the spaCy model using *WanDB*'s sweeping function to ~70% recall
- Created and finetuned other NER models, including *Stanford Stanza* and *HanLP*

CodeDay Lab — Washington, United States (Remote)
Front End Developer — Jul 2021 – Aug 2021

- Built a web app using *Angular* that enables users to donate to charities using cryptocurrency
- Gained in-depth knowledge about web development and *Angular* framework through the project
- Applied *REST API* to the backend *MongoDB* database to ensure seamless data communication

PROJECTS & ACTIVITIES

Facial Recognition Attendance Taker

- Used a *Raspberry Pi* to automatically scan students' faces and recognize them using the *face-recognition* and *OpenCV* package integrated with an external camera
- Sent the list of names of students as an email to the teacher for attendance using *SMTPlib*

Animal Crossing and Doom Image Classifier

- Created a deep-learning model using *Keras* and *TensorFlow* to classify images to be animal crossing or doom-related with ~86% accuracy
- Deployed the model in a *Docker* container with *Gunicorn* that can be accessed as an API

London Bike Usage Regressor

- Created a regression model predicting the number of bikes rented during a specific hour in London with ~0.30 RMSE
- Deployed the model in a *Docker* container with *Gunicorn* that can be accessed as an API

AWARDS

President's Gold Entrance Scholarship — Issued by Wilfrid Laurier University
Excellence in Computer Science Award — Issued by American School of Milan
